

Fermented Ganoderma Lucidum Powder

Product Information

Description	Fermented Ganoderma Lucidum Powder is obtained by microbial fermentation, inactivation and spray-drying of ganoderma lucidum. Fermentation facilitates dissolution and biotransformation of ganoderma polysaccharides and triterpenes, enriching diverse postbiotic active metabolites. It possesses free-radical scavenging capacity and antioxidant potential, and helps regulate body immune status. Its postbiotic characteristic grants heat-processing tolerance, making it applicable for solid beverages, tablet candies, dietary supplements and other end-products.
Form	powder
Stability	24 Months
Storage	Store in cool, dry place
