

## Bifidobacterium Adolescentis Freeze Dried Powder

### Product Information

<b>Cat#</b>	PRBT-003
<b>Description</b>	Bifidobacterium adolescentis are normal inhabitants of healthy human and animal intestinal tracts. Colonization of B. adolescentis in the gut occurs immediately after birth. Their population in the gut tends to maintain relative stability until late adulthood, where factors such as diet, stress, and antibiotics causes it to decline.
<b>Appearance</b>	White To Light Yellow-Colored, Free-Flowing Powder
<b>Form</b>	Powder
<b>Activity</b>	10 billion CFU/g or more
