Bifidobacterium Infantis Freeze Dried Powder

Product Information

Cat#	PRBT-005
Description	B. infantis is isolated from the intestinal flora of breastfed, healthy infants. It is an anaerobic, gram-positive, bacterium. It is most abundant in infants since its numbers decline as we age. This decrease of probiotic bacteria, especially B. infantis, is closely related to the growth of pathogenic bacteria, diarrhea and other gastrointestinal diseases. Maintaining essential populations of B. infantis is critical to the suppression of harmful bacteria growth, the enhancement of infant immune function, and the reduction of infant diarrhea.
Applications	<ul style="list-style-type: none">• Dietary Supplements - Capsules, Powder, Tablets;• Food - Bars, Powdered Beverages.
Appearance	White To Light Yellow-Colored, Free-Flowing Powder
Form	Powder
Activity	10 billion CFU/g or more
Stability	24 Months
Storage	Recommend storage at refrigeration (4 °C) or frozen temperature (-18 °C) in original, sealed package until processed.
Synonyms	Bifidobacterium Infantis Bulk for Immune System Regulation; Bifidobacterium Infantis
