

Bifidobacterium animalis Freeze Dried Powder

Product Information

Cat#	PRBT-094
Description	Bifidobacterium animalis is a gram-positive, anaerobic, rod-shaped bacterium of the Bifidobacterium genus which can be found in the large intestines of most mammals, including humans. Bifidobacterium animalis grows well in milk, its resistance to acid and oxidative stress renders strains from these species ideally suited to their formulation in fermented milk products.
Appearance	White to light yellow-free-flowing powder
Form	powder
Activity	10 billion CFU/g or more
Stability	24 Months
Storage	Recommend storage at frozen temperature (-18 °C) or lower in original, sealed package away from light.
