## **Bacillus Licheniformis Freeze-drying Powder (feed grade)**

### **Product Information**

<b>Cat#</b>	PRBT-102
<b>Description</b>	Bacillus licheniformis is a Gram-positive, endospore-forming organism that can be easily isolated from soil and plant samples. Bacillus licheniformis produces several classes of antimicrobial substances, including bacteriocins. The unique capability of B. licheniformis to synthesize and produce a range of different antibacterial compounds means that this organism can act as a natural universal vehicle for antibiotic substances in the form of probiotic cultures and strains to combat various types of pathogens, including mycobacteria.
<b>Appearance</b>	White to light yellow-free-flowing powder
<b>Form</b>	powder
<b>Activity</b>	10 billion CFU/g or more
<b>Stability</b>	24 Months
<b>Storage</b>	Recommend storage at frozen temperature (-18 °C) or lower in original, sealed package away from light.
