

Fermented Ginseng Powder

Product Information

Description	Fermented Ginseng Powder is refined from ginseng via microbial fermentation and subsequent drying. Fermentation transforms ginsenosides and improves the bioavailability of active components, enriching postbiotic metabolites including peptides and organic acids. It exhibits antioxidant activity, modulates immune-related factors and relieves oxidative stress in the body. Thermostable for food processing without live-bacteria constraints, it can be used in tablet candies, solid beverages, dietary supplements and other functional foods.
Form	powder
Stability	24 Months
Storage	Store in cool, dry place
